JFK assassination records, PA appeals
New Orleans and Dallas records
Mrs. Dionne Turner

Harold Weisberg 11/27/79

In Section 145 of 62-109060 Serial 5817 stands alone. I've checked the next Sections and there is no further reference to the report of Mr., not Mrs. Turner, that she believed her phone was tapped because it was used by friends who were Garrison targets or his so-called major witness. She names these are Richard Townley, Perry Russo and Layton Martens. I have no knowledge of her friendship with Townley but I can confirm her association with the other two.

To my knowledge Mr. Turner was a narcfink, I suspect in return for supplies.

Before I knew her

At the time of this 1967 information she was about 20 years old. Earlier and later she had involvements with several Warren Commission witnesses.

If my recollection is correct I appealed withholdings shortly after I received the New Orleans field office records that were provided. From what was not withheld Mrs. Turner was engaged in mischief relating to me with one Carlos Bringuier, an ultra of the right in the New Orleans Cuban refugee community, one known to his peers as "The Stupidity." Bringuier then retailed the fabrication to the FBI, which reported it without any questions. I have heard nothing relating to this appeal.

Neither this record nor anything relating to it has been provided from the Dallas or New Orleans records. Copies were sent to both offices. No follow-up records have been provided. While I am not interested in the name of the phone company person which is withheld I am interested in the content of the other withholding. That she was an informant and has a criminal record are public knowledge. (Her most recent criminal record of which I know is in Houston, Texas.)

Mrs. Turner is very much involved in the Warren and Garrison investigations as well as my PA requests. I would like all information relating to her, including but not limited to the named field offices. (She comes from Memphis.) If this has to be regarded as a new request will you please forward a copy to the FBI? And drug people?

The inference is that Garrison was tapping her phone. I doubt this matter would have reached there, given the FBI's interest in Garrison.

There is a stamp, to which notations were added, in the lower left margin of the airtel. It is not legible on the copy provided. I would appreciate a legible copy, particularly because the FBI has seen fit to disclose Ms. Turner's defamation of me despite my prior effort to exercise my PA rights.

Why this records had to reach Gable, who was a USSR expert, is not apparent, but I ask for a search of the files of his Division. If the Bishop to whom a copy was routed is the Bishop of "Crime Records," then I ask for a search there also. He was part of the FBI's leaking operations. He was involved in New Orleans aspects.
